Project Link:
Live Demo:

- Built a full-stack e-commerce web application using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Designed and implemented responsive user interfaces using React.js and Tailwind CSS.
- Developed RESTful APIs with Node.js and Express.js for product management operations (Add, Edit, Delete, List).
- Integrated Redux for state management and seamless UI updates.
- Used MongoDB Atlas as the cloud database to store and retrieve product data.
- Deployed the frontend on Vercel and AWS S3, and backend API on AWS EC2, ensuring reliable performance.
- Configured EC2 instance with SSH access and used PM2 for server process management.
- Handled version control and collaboration using Git and GitHub.
- Implemented error handling, routing, and form validations for a robust user experience.
